

Class 3 Group Discussion Worksheet

Group name: _____

Reporter: _____

1. What are the observational units that constitute the sample of data being visualized in the plot above?
2. How many variables are represented in this plot and which of these variables are categorical?
3. How would you describe the distribution of diesel cars compared to the distribution of traditional gas-powered cars?
4. Come up with a bad title for this plot, one that intentionally misleads careless readers.
